CONSTRUCTION SPECIFICATIONS

We're built differently...

Choosing the right builder for your new home is one of the most important decisions you'll make. The search can often be challenging and confusing, with many people making their choice based solely on the initial price estimate.

While pricing is undeniably crucial — nobody wants to overpay — it's important to understand what is included in the "base price" provided by different builders. Not all builders are transparent about this, leading to potential misunderstandings and unexpected costs down the line.

At Canbury Homes, we aim to eliminate this confusion by clearly outlining what our standard specifications include. This transparency helps you make an informed decision by comparing our offerings with those of our competitors. We believe that when it comes to pricing your new home, you deserve to know exactly what you're paying for.

Construction

FLOOR FRAMING

- 2" x 10" Floor Joists at 16" O.C. with staggered solid bridging (26' & 27' 6" widths)
